

Guardian Air RGF QR+™ Model QRP-9

QRP-9 Overview

Guardian Air™ does not need the pollutants to travel to the air handler for UV treatment or filtration. Guardian™ Air is proactive and sends ionized aggressive advanced oxidizers into the room to destroy the pollutants at the source, in the air and on surfaces, before they can reach your family, clients or employees.

The Guardian Air QR+ by RGF® is designed to eliminate sick building syndrome risks by reducing odors, air pollutants, VOCs (chemical odors), mold, bacteria and viruses. The Guardian Air QR+ units are easily mounted into air conditioning and heating systems air ducts where most sick building problems start. When the HVAC system is in operation, the Guardian Air QR+ unit creates an Advanced Oxidation Plasma consisting of Ionized Hydro-peroxides, Super oxide ions and Hydroxide ions. All are friendly oxidizers. By friendly oxidizers, we mean oxidizers that revert back to oxygen and hydrogen after the oxidation of the pollutant.

QRP-9 Features

- Kills bacteria, mold and virus
- Reduces odors and VOCs (chemical odors)
- Easier, Faster, No Tool Cell Replacement

Technical Specifications

Hydroperoxide Ion distribution	Distributed through air handler
Super Oxide Ion distribution	Distributed through air handler
Hydroxide Ion distribution	Distributed through air handler
Installation	Installed in HVAC duct or plenum
Electrical	24 VAC 0.7 Amps 17 Watts
Materials	Aluminum and Polymers
QR+ Cell Replacement	Recommended after 25,000 hrs
HVAC Blower Size	300 – 18,000 CFM

Model - QRP-9
